ArcelorMittal Tubular Products Karviná

## Investment in Packaging Automation

ArcelorMittal Tubular Products Karviná has completed its investment in the automation of steel tubes and profiles packaging. Manual packaging in Karviná has ended, replaced by a modern automated solution. The automated cycle of securing a rectangular bundle of profiles or a hexagonal bundle of tubes occurs without operator presence. The automatic packaging line can secure a six-meter bundle of profiles or tubes with steel bands in just 108 seconds.

*„With the integration of the automatic packaging equipment, we have completed the final phase of the investment project for production automation in the Profilovna. Packaging automation allows us to fully utilize the capacity of rolling lines no. 7 and 10,”* said René Fabik, CEO of ArcelorMittal Tubular Products Karviná.

## Tube Fair Düsseldorf: Meeting Key Partners

The commercial and technical team of ArcelorMittal Tubular Products Karviná attended this year's Tube Fair Düsseldorf. During the fair, they met with key customers, presented the changes within the company, and the expansion of the Karviná plant. They also established contact with leading industry experts, explored the latest trends, and showcased their know-how. Technologists from Karviná visited present manufacturers to inspect welding for the modernization of the longitudinal slitting line, aiming to reduce energy consumption and improve the quality of the slit edge.

## Product Presentation in Prešov

In May 2024, ArcelorMittal Tubular Products Karviná participated in the supplier exhibition EXPO Prešov 2024, organized by EMPIRIA Piešťany, a long-time customer of the Karviná company and a significant seller in the water-gas-heating segment in Slovakia. The aim of the presentation was to promote the sale of hot-reduced pipes produced in Karviná. These pipes are purchased black and galvanized in Slovakia, but in recent years, mainly in a painted finish.

## Health Day: Safety and Well-being as Priorities

The traditional Health and Safety Day at the Karviná plant marked a week full of activities emphasizing the importance of workplace safety and well-being. Throughout the week, various activities took place, including training sessions, exercises, healthy lunches, and engaging lectures. ArcelorMittal Tubular Products

Karviná screened the awareness video "Working at Heights" and discussed the golden rules of safety.

## Open Day and Family Day in Karviná

ArcelorMittal Tubular Products Karviná hosted an Open Day and Family Day on Wednesday, May 1, 2024. The event attracted more than 100 visitors, including current and former employees, their families, and local community representatives. Visitors toured the production area, learned about new investments and ongoing developments in Karviná. Numerous fun activities were prepared for children.

## Supporting Young Technical Talents

René Fabik, CEO of ArcelorMittal Tubular Products Karviná, and HR Director Andrea Ševčková attended the 11th annual Olympiad of the Secondary School of Technology and Services Karviná on May 10, 2024. High school students from the North Moravian region competed in knowledge and unconventional activities for interesting prizes. ArcelorMittal Tubular Products Karviná has long supported this school, allowing its students to undertake internships and excursions.

## Supporting Education: Computers for Students

At the beginning of June, representatives of ArcelorMittal Tubular Products Karviná handed over decommissioned computers from production to the Secondary Industrial School of Karviná. Students can train their IT skills on them, which they will use in practice. The Karviná company has long cooperated with this school and supports its students in their professional growth.

## Environment Day: Planting Greenery

As part of Environment Day, ArcelorMittal Tubular Products Karviná organized an event focused on planting greenery in Petrovice near Karviná. Company employees, together with students from the Secondary School of Technology and Services Karviná, planted ornamental shrubs and trees. The Karviná plant thanks the representatives of the municipality and the school for their help in organizing this activity.
