## Open Day and Family Day were a success

ArcelorMittal Tubular Products Karviná held an Open Day and Family Day on 7 May. Despite the poor weather, 140 visitors big and small visited the premises of the Karviná company. The rich programme included a tour of the plant, refreshments, and fun-park, games and sweet treats for children. We thank everyone for their participation and look forward to next year.

**As of May 2022, Tanja Susanna Mantere is the new CEO of ArcelorMittal Tubular Products Europe.**

## Customer Appreciation Day in Karviná was made more interesting by go-karting

The Karviná plant of ArcelorMittal Tubular Products prepared a tour of the production facilities and a presentation of the production portfolio for its customers on 19 May. This was followed by go-kart races as an addition to the programme. The one-day event ended with a festive dinner with free time

## Important audits successfully completed

During May and June, the ArcelorMittal Tubular Products Karviná plant successfully completed several important audits that demonstrated the high level of the company's management system. In May, these included quality audits according to ISO 9001, quality for the automotive to IATF 16949, and quality for the environment to ISO 14001. At the same time, a recertification audit of the health and safety system according to ISO 45001 was also held.

As for product certifications, the Karviná plant was audited by ZETOM for the first time in order to be able to supply pressure tubes to the Polish construction market. The Karviná division of SBU Automotive, in turn, welcomed both existing business partners (ZF Slovakia) and potential customers (Tenneco) in customer audits. In both cases, the auditors confirmed the potential for further business cooperation. The requirements of the automotive partners also triggered a review process of the level of the Information Security Management System (ISMS) to obtain the TISAX certification this year.

## Compliance with the integrated permit in Karviná? Confirmed!

An extensive inspection by the Czech Environmental Inspectorate (CEI) carried out from March to May this year confirmed compliance with the legislative requirements and conditions for the integrated permit of the ArcelorMittal Tubular Products Karviná production plant. The independent assessment team evaluated in detail the compliance with the conditions in air and water protection, waste management, and related legislation.

## Health and Safety Day aka "It all starts with me and continues with you"

This motto was used to launch the 16th annual Health and Safety Day at all ArcelorMittal divisions. The Karviná plant organised expert lectures for employees on occupational health and safety, employees could undergo special skin and eye examinations, and only healthy food was served in the canteen that day. Employees also received gifts, and those with the best health and safety scores received a gift voucher for a massage. Health and safety at work is one of ArcelorMittal's core values and priorities.

## Did you know...?

The Karviná division of SBU Automotive specializes in the manufacturing of precision-calibrated and drawn tubes and sections for the automotive industry. The division's products are used in applications such as doors, steering systems, and other automotive parts.

## Forum Nová Karolina, Ostrava (CZ)

Water pipes from the ArcelorMittal Tubular Products Karviná production plant were used in the construction of the Forum Nová Karolina shopping and entertainment centre in Ostrava between 2008 and 2012.
